

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. **(Original)** A heating and/or air conditioning system for a motor vehicle, having a housing (1), the housing being composed of a plurality of housing segments (2, 3, 4, 5), characterized in that at least one housing segment is designed as an insert part (5), the insert part (5) being inserted into the remaining housing only after the remaining housing (2, 3, 4) is installed in the motor vehicle, and the insert part (5) comprising at least one functional subassembly.
2. **(Original)** The heating and/or air conditioning system as claimed in claim 1, characterized in that the functional subassembly comprises at least one air-guiding means (7, 5.5, 5.3, 5.4).
3. **(Currently amended)** The heating and/or air conditioning system as claimed in claim 1 ~~[[or 2]]~~, characterized in that the functional subassembly is a mixing module for a rear region.
4. **(Currently amended)** The heating and/or air conditioning system as claimed in ~~claims 1 to 3~~ claim 1, characterized in that the functional subassembly comprises a hot air supply (5.3) and/or a cold air supply (5.4).
5. **(Currently amended)** The heating and/or air conditioning system as claimed in ~~one of claims 1 to 4~~ claim 1, characterized in that the functional subassembly comprises at least one mixing flap (5.1).
6. **(Original)** The heating and/or air conditioning system as claimed in claim 5, characterized in that the functional subassembly comprises at least one drive (5.2) for the at least one mixing flap (5.1).

7. **(Currently amended)** The heating and/or air conditioning system as claimed in ~~one of the preceding claims~~ claim 1, characterized in that the insert part (5) is formed symmetrically with respect to a longitudinal axis (L).
8. **(New)** The heating and/or air conditioning system as claimed in claim 2, characterized in that the functional subassembly is a mixing module for a rear region.
9. **(New)** The heating and/or air conditioning system as claimed in claim 2, characterized in that the functional subassembly comprises a hot air supply (5.3) and/or a cold air supply (5.4).
10. **(New)** The heating and/or air conditioning system as claimed in claim 3, characterized in that the functional subassembly comprises a hot air supply (5.3) and/or a cold air supply (5.4).
11. **(New)** The heating and/or air conditioning system as claimed in claim 2, characterized in that the functional subassembly comprises at least one mixing flap (5.1).
12. **(New)** The heating and/or air conditioning system as claimed in claim 3, characterized in that the functional subassembly comprises at least one mixing flap (5.1).
13. **(New)** The heating and/or air conditioning system as claimed in claim 4, characterized in that the functional subassembly comprises at least one mixing flap (5.1).
14. **(New)** The heating and/or air conditioning system as claimed in claim 2, characterized in that the insert part (5) is formed symmetrically with respect to a

longitudinal axis (L).

15. **(New)** The heating and/or air conditioning system as claimed in claim 3, characterized in that the insert part (5) is formed symmetrically with respect to a longitudinal axis (L).

16. **(New)** The heating and/or air conditioning system as claimed in claim 4, characterized in that the insert part (5) is formed symmetrically with respect to a longitudinal axis (L).

17. **(New)** The heating and/or air conditioning system as claimed in claim 5, characterized in that the insert part (5) is formed symmetrically with respect to a longitudinal axis (L).

18. **(New)** The heating and/or air conditioning system as claimed in claim 6, characterized in that the insert part (5) is formed symmetrically with respect to a longitudinal axis (L).
